LINNÉA SÖRLING

PORTFOLIO / LINNÉA SÖRLING

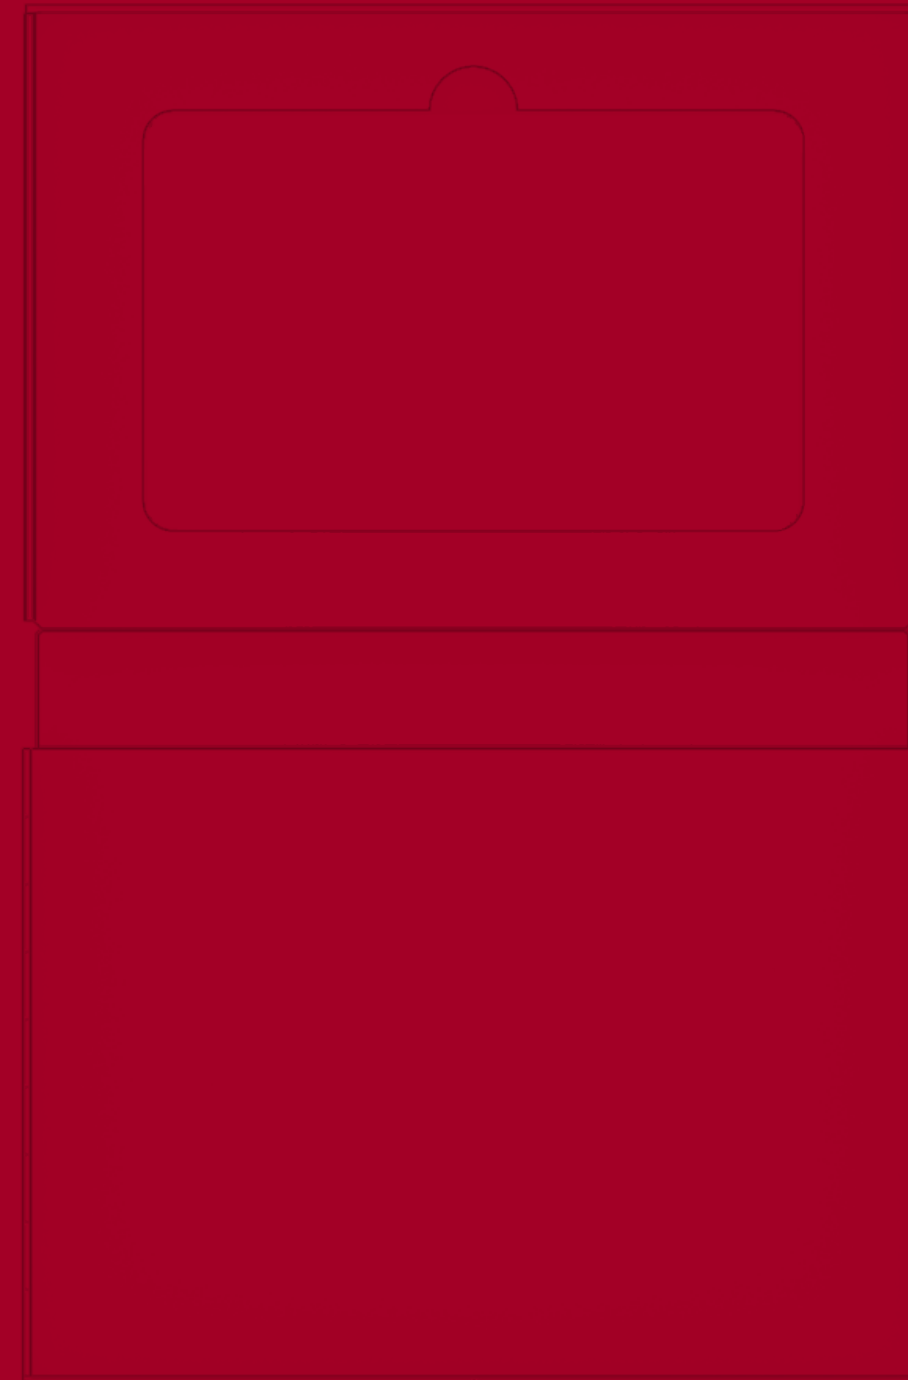

/ Designer with a strong foundation in graphic design, industrial design, and product development. Experienced in driving design work from idea to finished product, including concept development, customer presentations, feedback rounds, iteration, and production-ready execution. Detail-driven, technically curious, and highly structured, with a strong focus on visual quality, workflow efficiency, and practical production.

UNIBAIL-RODAMCO-WESTFIELD / WMOS GIFT BOX

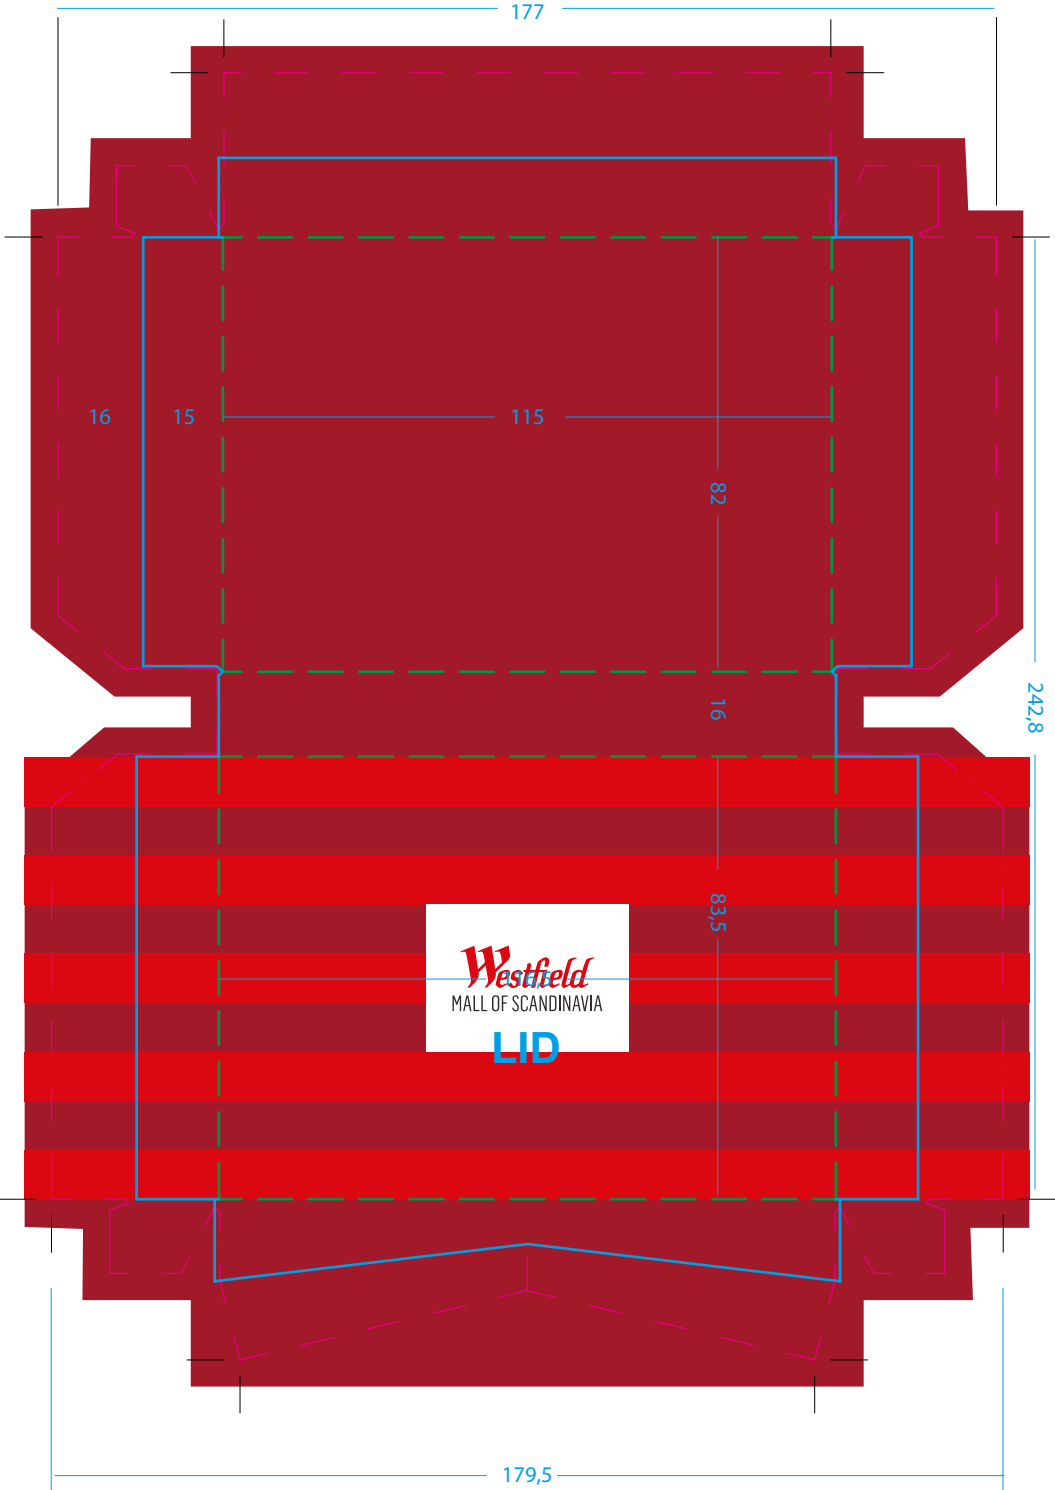

/ WESTFIELD MALL OF SCANDINAVIA – GIFT BOX PRINT DESIGN & RENDERINGS

/ Print design, production files, and photorealistic renderings for Westfield Mall of Scandinavia's gift box and gift card packaging. Specified cardboard material, developed structural sketch from client brief, and created print-ready artwork in Illustrator for both packaging and gift card. Once produced, additionally modelled the packaging in Rhino and rendered in Blender to deliver hero images for their website. All work developed in close alignment with Westfield's brand guidelines, as part of an ongoing client relationship covering all print and design production for their Swedish operations.

INDEPENDENT DEKOR AB / MINECRAFT LIVE

/ PROP DEVELOPMENT FOR LIVE BROADCAST PRODUCTION

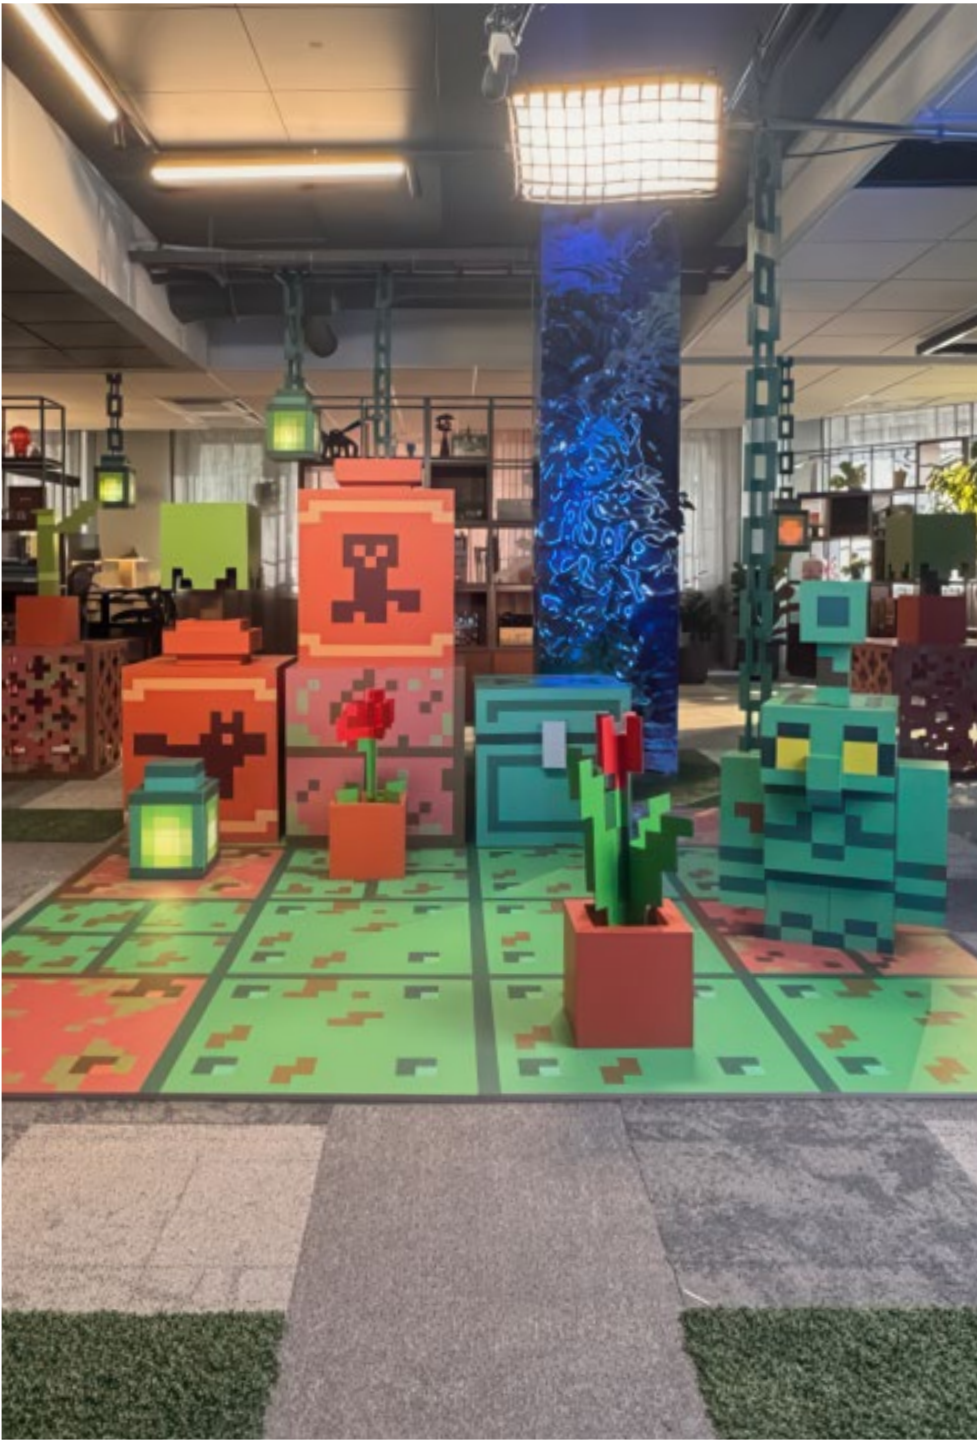

/ Responsible for design, installation sketches, and production files for three full set configurations across lobby and studio areas - covering everything from large-scale Golem figures to pixel floor tiles, hanging lanterns, and botanical props. Production spanned multiple materials and techniques including PGM vinyl, transparent and opal acrylic, laser cutting, and dibond - all coordinated across multiple print orders within a one-week window.

WSP SWEDEN / WSP MARIEVIK

/ WORKPLACE SIGNAGE & VISUAL IDENTITY - LARGE-SCALE INTERIOR PROJECT ACROSS 4 FLOORS

/ End-to-end signage project for WSP's new flagship office at Marievik, Stockholm. Responsible for design, production files, installation sketches, and client visualizations across all deliverables - totaling over 2 200 individual items across 4 floors. Deliverables included room and locker numbering, QR codes, wall decor, contrast markings, acoustic panels, LED signage, and bespoke custom solutions. All room numbers and QR codes were generated automatically through a parametric InDesign system linked to CSV data, producing unique, location-specific files with multilayer print specifications. Coordinated closely with architects and project managers throughout.

CONTRACTOR.

UNIVERSITY OF GÄVLE / DEGREE PROJECT / **REFLECT**

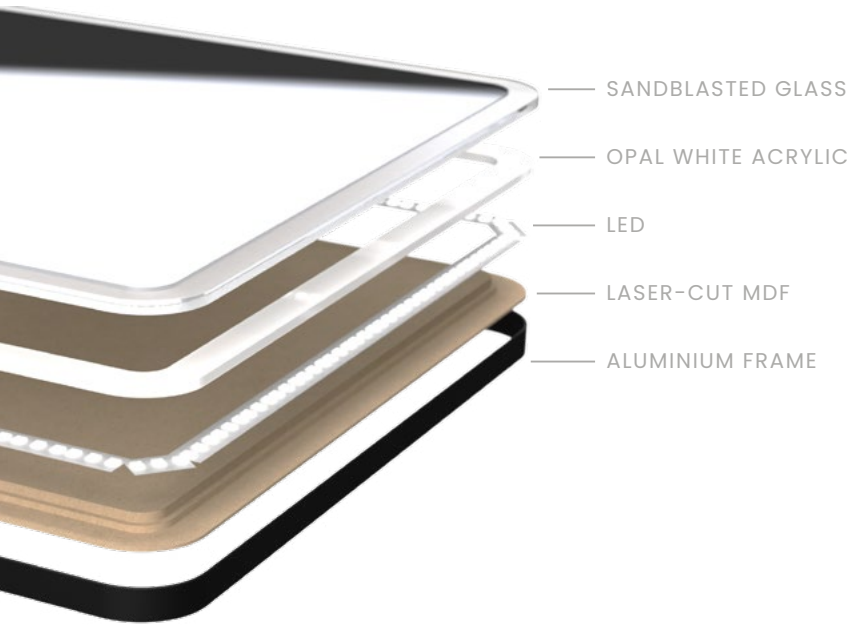

/ MULTIFUNCTIONAL TABLE DESIGN

/ Degree project at the University of Gävle, developed from a prior concept into a full-scale prototype. Conducted user research, observations, and iterative user testing to validate and refine the design. Materials were selected through physical testing – including back-lit acrylic samples to determine optimal light diffusion and sandblasted glass for a seamless illuminated edge. Every construction decision balanced technical constraints with aesthetics and production reality. All dimensions follow Swedish standard SS-EN 527-1:2011, with mirror angle and shelf depth verified through physical function models and user testing across multiple heights. Prototyped in collaboration with external steel fabricators and specialist suppliers. Awarded Product Developer of the Year at the graduation exhibition.

EDBLAD / JEWELRY VISUALIZATION

/ JEWELRY 3D-MODEL & RENDER

/ Visualization project based on a self-initiated brand analysis. Selected a piece from Edblad's collection and reverse-engineered dimensions and proportions from reference only. Studied Edblad's visual identity - color language, materiality, and tone - and translated this into deliberate choices for materials, lighting, and scene composition. Modelled in Rhino, materials developed in Blender with physical properties, rendered in Keyshot, and post-processed in Photoshop. Delivered as still renders and animation.

METER JAROWSKIJ AB / PRIME VIDEO / LOL / **TROPHY BELT**

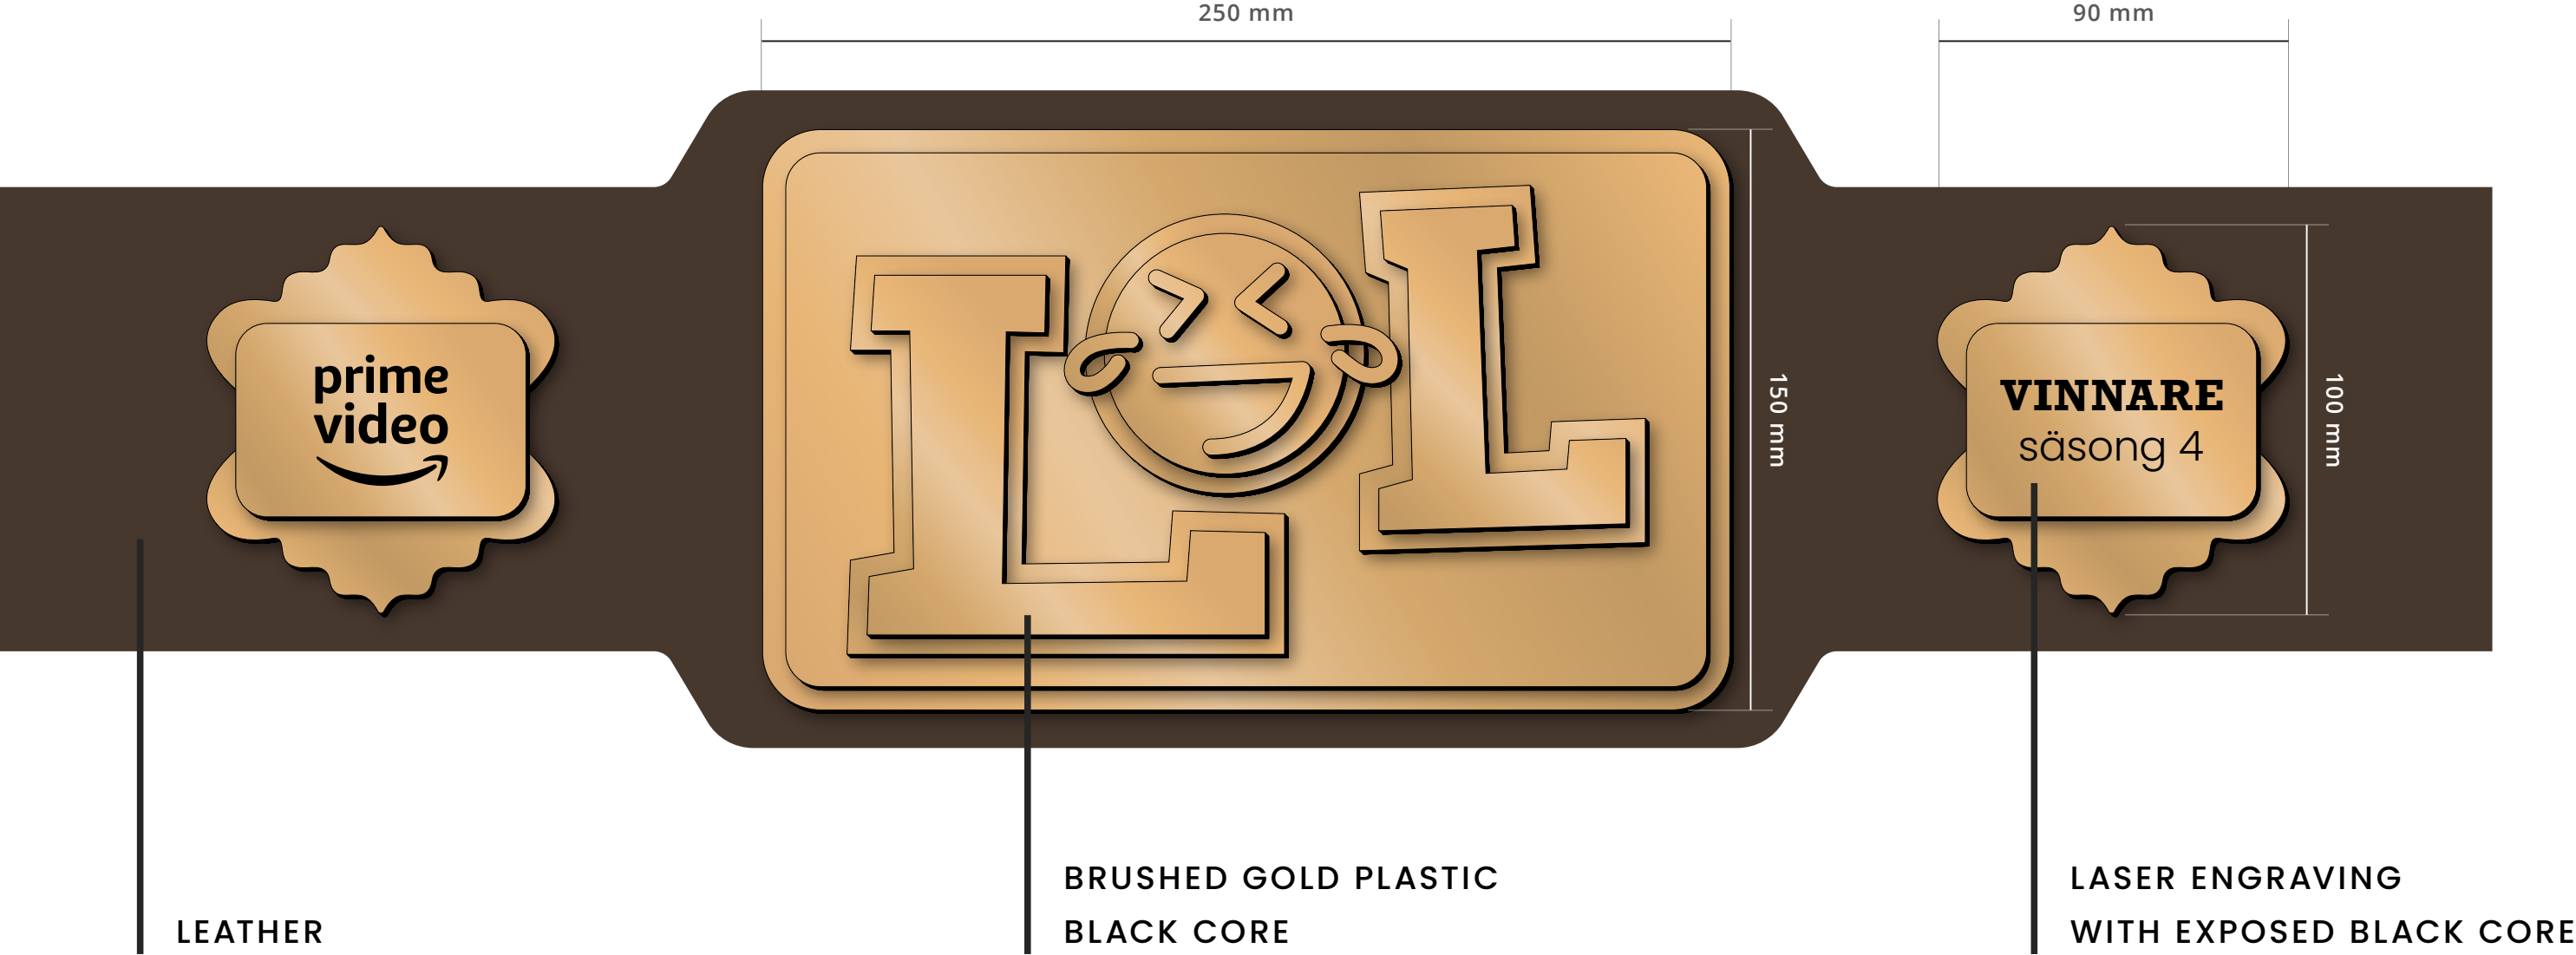

/ PROP DEVELOPMENT FOR TV SERIES PRODUCTION

/ Prop design and development for Swedish comedy series LOL, produced by Meter Jarowskij AB and aired on Prime Video. Designed a custom trophy belt in brushed gold laser-cut plastic with black core, laser engraved and mounted on leather. Responsible for sketch, production files, and material specification.

H&M HOME / **PRODUCT CONCEPTS**

/ PRODUCT DEVELOPMENT THROUGH 3D MODELLING

/ Self-initiated concept project developed as part of a job application for H&M Home. Analyzed the brand's visual identity, product range, and design language, then independently developed and 3D-modelled two new product concepts - a marble tray and a ribbed glass vase - using custom-built displacement textures, and presented in H&M Home's own e-commerce format. Completed within a single day, demonstrating rapid brand analysis, initiative, and the ability to deliver production-ready visuals under tight time constraints.

MARBLE TRAY
599 KR

COLOUR: BEIGE / BLACK

 ADD TO BAG

DESCRIPTION

A fast concept sketch made with inspiration based on the mood board and H&M Home brand. The serving tray is designed after the existing serving tray.

Rectangular stone, steel frame with handles, silicone feet.

Art. No.: 0629294001

Size:
Height: 6 cm
Width: 25 cm
Length: 35 cm
